

AI Medicine Reminder Agent

Intelligent, agentic medication adherence — reducing preventable hospitalizations through proactive, personalized patient engagement.

INVESTOR PITCH DECK

DIGITAL HEALTH · AI

Made with GAMMA

A Crisis Hiding in Plain Sight

Medication non-adherence is a **silent epidemic** — and one of the most costly, preventable failures in modern healthcare.

50%

Patients Non-Adherent

Fail to follow prescribed regimens (WHO)

\$300B

Annual Cost (US)

Preventable hospitalizations and complications

125K

Deaths Per Year

Directly attributable to medication non-adherence

10%

Of total US expenditure tied to non-adherence

OUR SOLUTION

Proactive. Personal. Persistent.

The AI Medicine Reminder Agent is an **autonomous agentic system** that goes beyond passive alerts. It learns patient behavior, adapts messaging, and escalates to caregivers — closing the adherence gap before it becomes a crisis.

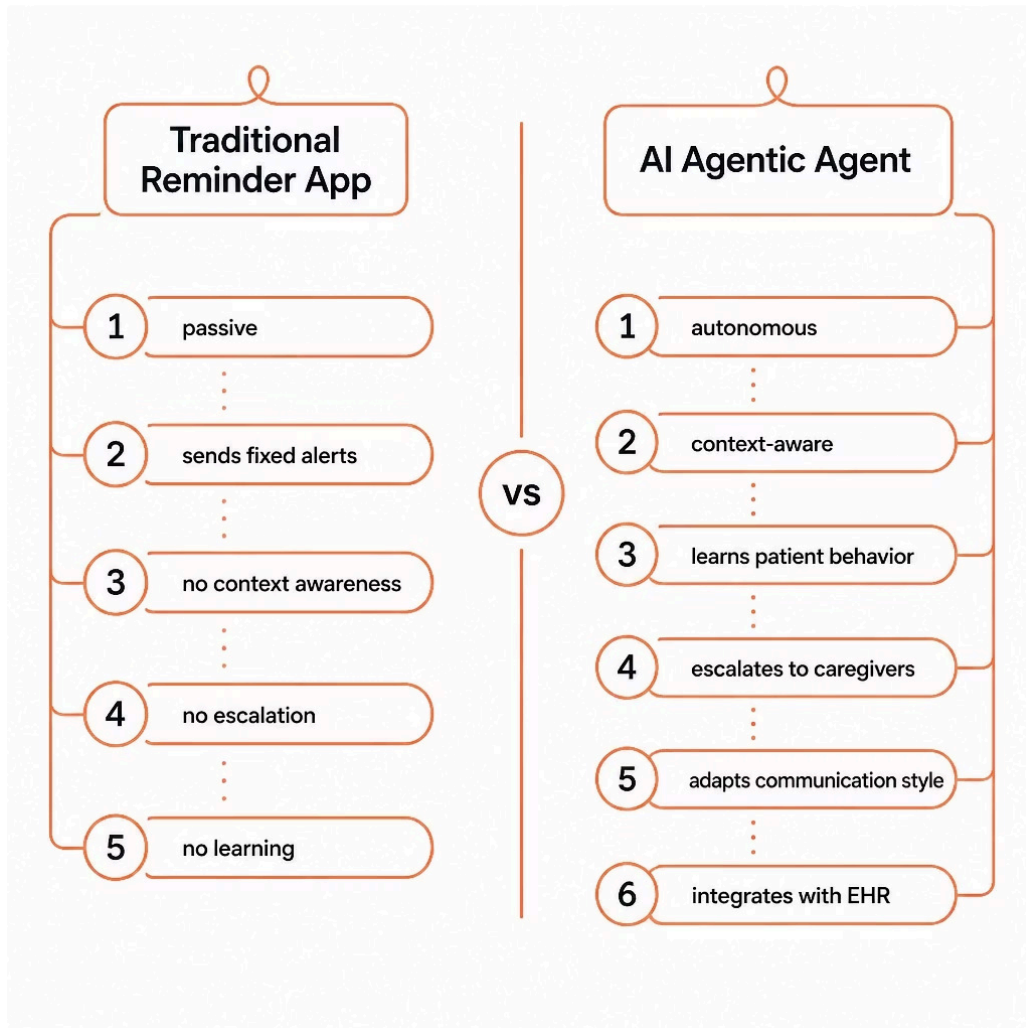

→ **Personalized Scheduling**
Adapts to individual routines and preferences

→ **Intelligent Escalation**
Alerts caregivers when doses are missed

→ **Continuous Learning**
Improves engagement through behavioral data

Why **Agentic AI** Changes Everything

Traditional reminders are passive and one-size-fits-all. Agentic AI **thinks, decides, and acts** — transforming medication management from a notification into a care intervention.

The Agentic Advantage

- Autonomous decision-making without human triggers
- Context-aware: adapts to patient lifestyle and history
- Multi-channel: SMS, app, voice, and caregiver alerts
- Continuous improvement via reinforcement learning
- Seamless EHR and pharmacy integration

System Architecture

A modular, cloud-native architecture designed for **scalability, security, and clinical interoperability** — built to meet enterprise healthcare standards.

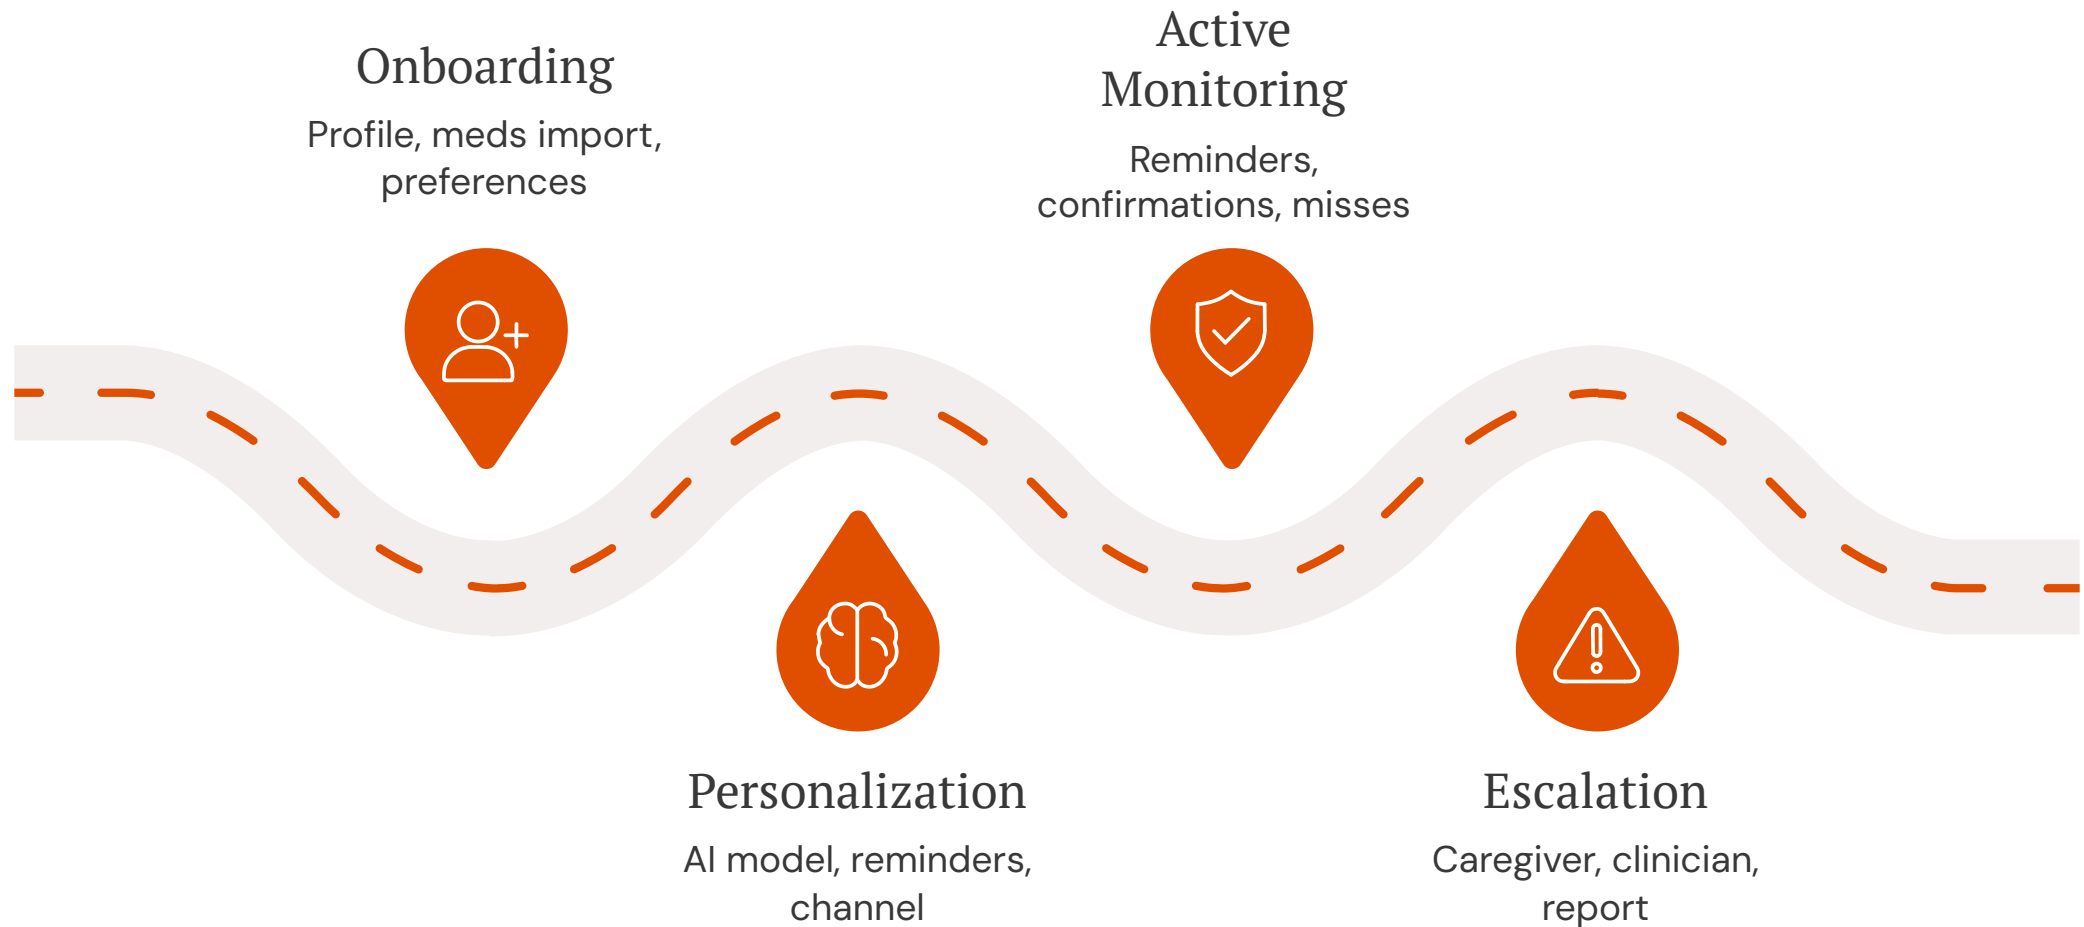

Enterprise-Grade by Design

- **HIPAA & GDPR compliant** data pipelines
- **RESTful APIs** for EHR and pharmacy systems
- **Real-time event streaming** for instant escalation
- **Multi-tenant** cloud infrastructure
- **Role-based access** for patients, caregivers, and clinicians

End-to-End Patient Workflow

From prescription to adherence — every touchpoint is intelligent, personalized, and clinically informed.

The entire cycle operates autonomously — reducing clinician workload while dramatically improving patient outcomes and adherence rates.

Technology Stack

Built on proven, enterprise-ready technologies — chosen for reliability, scalability, and healthcare compliance.

AI & ML Core

OpenAI GPT-4o, LangChain, TensorFlow — for natural language understanding and predictive adherence modeling

Cloud Infrastructure

AWS HealthLake, Azure API for FHIR — HIPAA-compliant, scalable, multi-region deployment

Patient Interface

React Native (iOS & Android), Twilio SMS, Amazon Polly voice — multi-channel patient engagement

Healthcare Integration

HL7 FHIR, Epic & Cerner APIs, pharmacy data feeds — seamless interoperability with existing systems

Key Features

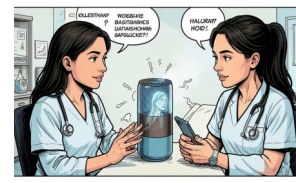

Smart Scheduling

AI learns daily routines and optimizes reminder timing for maximum compliance

Caregiver Escalation

Automated alerts to family and clinicians when critical doses are missed

Voice & NLP

Natural language interaction via voice assistants for elderly and accessibility needs

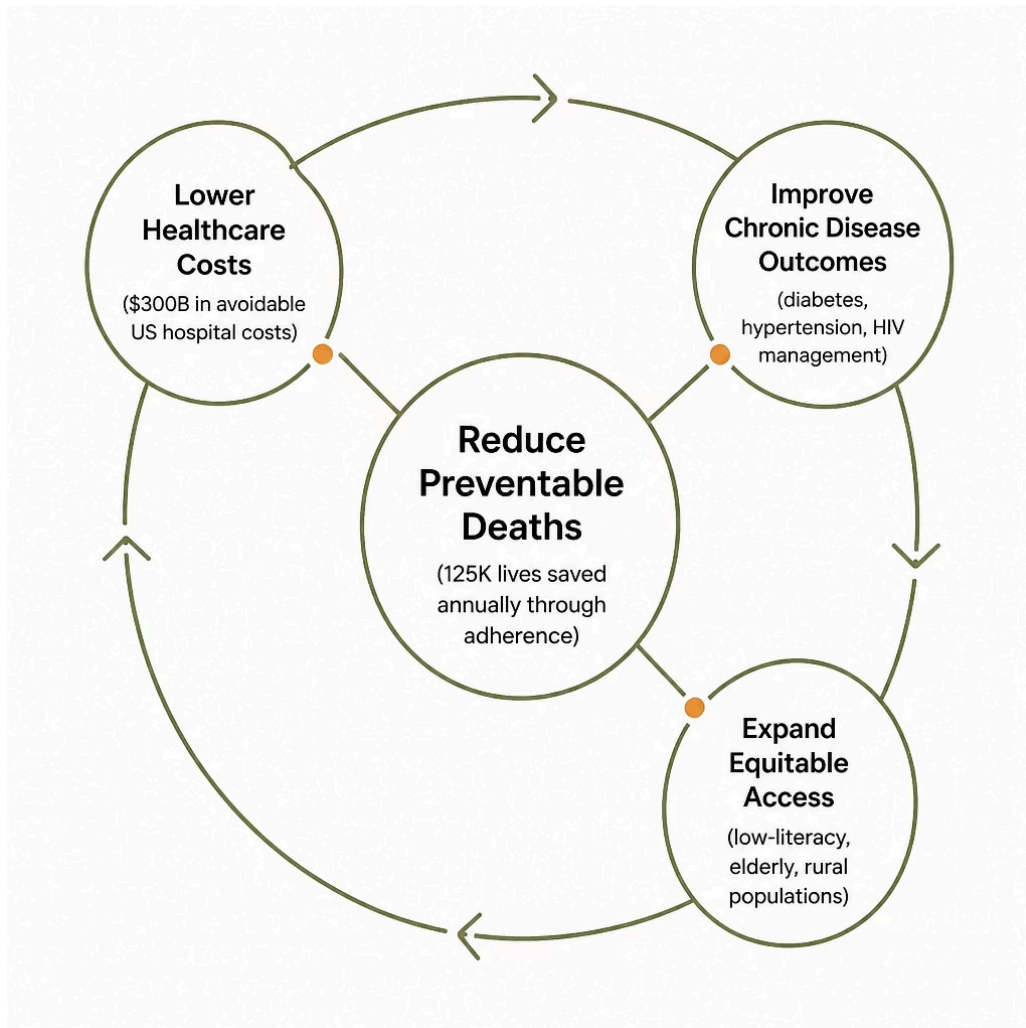

Population Analytics

Real-time adherence dashboards and risk stratification for care teams

Impact on UN Sustainable Development Goal 3

Good Health & Well-Being — our platform directly advances SDG 3 by improving medication adherence at scale, reducing preventable mortality, and enabling equitable access to proactive care.

Measurable Outcomes

- Target: **40% improvement** in adherence rates within 6 months
- Projected **20% reduction** in hospital readmissions
- Scalable to **low-resource and rural settings** via SMS-first design
- Supports **chronic disease management** at population scale

📄 Aligned with WHO Global Action Plan on Medication Adherence 2023–2030

The Road Ahead

- 1 — Q1 2025 — Pilot Launch
3 hospital partners, 500 patients, core reminder & escalation features live
- 2 — Q3 2025 — EHR Integration
Epic & Cerner certified, voice assistant launch, caregiver portal
- 3 — 2026 — Scale & Partnerships
Insurance payer integrations, FDA SaMD pathway, international expansion
- 4 — 2027 — Platform Vision
Full chronic disease management suite, population health analytics, global reach

Let's build the future of medication adherence — together. **Get in touch to explore partnership and investment opportunities.**
